

Benchmarking Study

BHP (Fluor) | \$150K | January 24

About The Project

BHP engaged Pantera to conduct a comprehensive benchmarking study aimed at evaluating productivity and performance across key areas of the project. The primary focus was to provide critical data and insights that would enable the EPCM/Owner team to optimise operations and ensure efficient resource allocation. The benchmarking study provided a comparative analysis against industry standards, identifying both strengths and areas for improvement. By leveraging this data, BHP was able to implement informed strategies to enhance overall project performance.

Project Scope

- ✓ Delivered detailed benchmarking data to assess project performance against industry standards and best practices.
- ✓ Conducted thorough productivity analysis to identify inefficiencies and areas for improvement.
- ✓ Provided actionable recommendations to improve operational efficiency and optimise resource utilisation.
- ✓ Supported the EPCM/Owner team in enhancing project strategies and reducing costs through data-driven insights.
